

In the Specification:

8
Please amend the Specification at page 9, lines 9-12, as follows:

A1 A booster is a compound which passes an in vitro Microsomal Assay described below in sections 2.1 through 2.7. A compound of the present invention inhibits or enhances at a concentration listed in Table A, an enzyme, to at least a broad % listed in Table A.

In the claims:

Please amend claims 1, 6 and 11 as follows.

- A2
- Sub C1
1. (Amended) A stable skin care product comprising:
 - a first composition comprising about 0.001% to about 10% of a retinoid selected from the group consisting of retinyl esters, retinol, retinal, and mixtures thereof;
 - a second composition comprising about 0.0001% to about 50% of at least one retinoid booster;
 - a first compartment for storing the first composition, wherein the first compartment keeps the first composition out of contact with oxygen; and
